Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 2, 6, 16, and 19-21 are rejected under 35 U.S.C. 102(a) as being anticipated by *Violante et al* (US 6,106,473).

Claims 1, 2, and 6: *Violante et al* anticipate all limitation of claims 1, 2, and 6 where the echogenic medical device such as needles consists of porous polymeric material (col. 2, lines 33-62). The method of preparing the echogenically enhanced medical device includes coating of the medical device with polymer and shaping the echogenic layer, which forms porous layer (col. 19, lines 56-67). The composition of the polymer layer includes contrast agents forming porous layer of coating onto the medical device. Since the contrast agent is inherently provides contrasting acoustic impedance, *Violante et al* clearly anticipates echogenically enhancing porous polymer layer has different acoustic impedance as the medical device.

Claims 16 and 19-21: *Violante et al* further disclose of echogenic medical device described above where the formation of the porous polymer layer is prepared by phase separation and blending (gas and liquid) of the polymer material with ultraviolet light as reaction/irradiation source (col. 3, lines 38-53). *Violante et al* also anticipates the absorption of body fluid by the porous polymer layer, which can change the echogenecity of the medical device (col. 3, lines 56-

65). Violante et al further anticipate that the size of the porous particles is at least 50 nanometers large (col. 4, lines 12-21).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
